

PURPOSE

This document describes the process of registering kidney donor and recipient pairs in the Australian and New Zealand Paired Kidney Exchange (ANZKX) program to create an enrolment in OrganMatch. To register a patient and donor in OrganMatch, a transplant coordinator must have appropriate OrganMatch access.

REGISTRATION STAGING

Registering a patient and donor is a three-step process:

1. Manage Enrolment- select the organ program and pathway.
2. Select People- search for the record in the system or create a new record.
3. Detailed Information- enter clinical information in the record.

Once a person is registered and the details have been saved but not submitted, the Registration moves to **In Progress** in the OrganMatch **Registration** menu. Data can continue to be added via Registration and the details can be edited during any step. When the registration is saved and submitted it moves to the **Completed** tab and the enrolment is created. No further updates can be made in the registration form after it has been submitted. Further data updates can be made via the person profile.

Records can be filtered on **Status, Organ Program** or **Transplant Pathway**.

The screenshot shows the 'Registration' interface. It includes a 'Filters' section with dropdown menus for 'Person', 'Status' (set to 'All'), 'Organ Program' (set to 'All'), and 'Transplant Pathway' (set to 'All'). Below the filters is a 'Registrations' section with an 'Add Registration' button and two tabs: 'In Progress' (selected) and 'Completed'. A table below the tabs shows columns for 'Date Created', 'Created By', 'Organ Program', 'Pathway', 'Last Name', 'First Name', 'Status', and 'Submitted By'.
